

NHN-SM

Optical MOS Module
光MOS模块

产品特点 FEATURES

- 输入/输出光耦隔离;
- 超高响应性;
- 高温自保护;
- 欧式端子、直插弹片式端子、MIL连接器接线方式;
- 输入信号为NPN型，输出信号为NPN/PNP通用型。
- I/O optocoupler isolation;
- Ultra high responsiveness;
- High temperature self protection;
- European terminal, in-line spring type terminal and mil connector wiring mode;
- The input signal is NPN type and the output signal is NPN / PNP GENERAL type.

适用范围 APPLICATION

应用于工业自动化设备、计算机外围接口设备、恒温系统、调温、电机控制、数控机械，遥控系统、工业自动化装置。

It is applied to industrial automation equipment, computer peripheral interface equipment, constant temperature system, temperature regulation, motor control, CNC machinery, remote control system and industrial automation device.

TLP系列固体继电器
TLP Series Solid State Relay

规格参数 SPECIFICATIONS

输入端 INPUT DATA

- | | | |
|----------|-----------------------|------------------|
| • 额定工作电压 | Rated working voltage | 5VDC/12VDC/24VDC |
| • 额定工作电流 | Rated working current | 5mA |
| • 接线极性 | Wiring polarity | 有极性(注意接线顺序) |

输出端 OUTPUT DATA

- | | | | | | | |
|-------------------|-----------------------------|---------------|--------|--------|-------|-------|
| • 负载电流 | load current | 1A | 2A | 3A | 4A | 5A |
| • 负载电压 | Load voltage | 60VDC | 100VDC | 100VDC | 60VDC | 30VDC |
| • 浪涌电流 | Surge current | 1A | 2A | 3A | 4A | 5A |
| • 最大动作频率 | Maximum operating frequency | 200HZ | | | | |
| • 最大压降(-40~100°C) | Maximum voltage drop | 0~0.8V | | | | |
| • 峰值电压 | Peak voltage | 2500V | | | | |
| • 控制通道数 | Number of bits | 4,8,16,32 | | | | |
| • 绝缘电阻 | Mohm | 100MΩ(500VDC) | | | | |
| • 导通时间(10~90%) | Conduction time | 0.5ms | | | | |
| • 关闭时间(10~90%) | Turn-OFF time | 0.03ms | | | | |
| • 隔离耐压 | Isolation withstand voltage | 3750Vrms | | | | |

环境及安规参数 CONDITIONS OF USE

- | | | |
|---------|--------------------------|--------------------|
| • 工作温度 | Working temperature | -30~+80°C(无结冰、结露) |
| • 存储温度 | Storage temperature | -30~+100°C(无结冰、结露) |
| • 安装方式 | Installation mode | DIN35导轨安装 |
| • 标准符合性 | Standard compliance | IEC61010-1 |
| • 最大温升 | Maximum temperature rise | 100°C |

注：本体温度达100°C时，会自保护断开输出信号，温度下降后下次触发时可再次导通。

Note: when the body temperature reaches 100°C , the output signal will be disconnected by self protection. After the temperature drops, it can be turned on again when triggered next time.
